

Attached is the updated master plan with the revised road alignment Yixiao had mentioned below. Included is an export with no trees as that may make integrating into GIS easier. Notice the scale change between the attached documents.

Let us know if you need anything else for this. We look forward to seeing the fiscal analysis outcome.

Best,

Ryan Blair

Subject: RE: Digital files for Yu Tract concept plan

Hi Ryan,

Thank you for investing and pushing from all ends on this project, very lucky to have this level of support from city! We do apologize that at a framework plan stage, we have not been drafting plan in CAD, our concept exhibit are composed with scaled hand drawn design and rendered in photoshop. There is one minor road alignment we are correcting to make sure we are aligning with context street stubs. We can have that updated first thing next week and send you the digital graphic in pdf format. Will that suffice the need?

Thank you!
